

# Solo<sup>®</sup>

## Sodium Chloride

### Description

**Solo<sup>®</sup>** (Sodium Chloride) Nasal wash is a non-drug, isotonic saline solution that is used to moisturize nasal membranes. This formulation provides comfort for extensive and continuous use.

### Composition

**Solo<sup>®</sup>** nasal wash: Each ml contains Sodium Chloride BP 9 mg.

### Indication

**Solo<sup>®</sup>** Nasal Wash is indicated for dry nasal membranes including dry nose resulting from cold and allergy medications. It moistens dry nasal passages from dry climates or from airplane travel, may help dissolve mucus from stuffy noses and clears the nose after surgery. This sterile saline solution is also used to cleanse various parts of the body (wounds, body cavities) and medical equipment (e.g. bandages, catheters, drainage tubes). It is also used as a mixing solution (diluent) for other medications used to irrigate the body (e.g. bacitracin, polymyxin).

### Dosage and administration

Infants & children : 1 drop into each nostril 1 to 3 times daily.

Adult: 1 to 3 drops into each nostril 1 to 3 times daily.

### Contraindication and side effect

No side effects are expected to occur. However stinging, sneezing, increased nasal discharge, or salty taste may occur in some cases.

### Precaution

Tell your doctor about your medical history, especially of heart problems (e.g., congestive heart failure), lung problems (pulmonary edema), kidney problems, low levels of potassium (hypokalemia), high levels of sodium (hyponatremia), and any allergies.

### Use in pregnancy and lactation

Tell your doctor if you are pregnant before using this medication. It is unknown if this medication passes into breast milk. Consult your doctor before breast-feeding.

Notes: Do not share this medication with others. Doing so may increase the risk of infection. Keep out of the reach of children.

### Storage

Store at room temperature (between 15°C to 30°C), away from light and moisture.

### How supplied

**Solo<sup>®</sup>** 0.9% Nasal Wash: Each plastic dropper bottle contains 15 ml saline solution.
